HAPPINESS 😊

Our school is privileged to have an incredible cohort of children who consistently arrive at school brimming with joy. It's an absolute delight to be a part of their journey and witness their rapid growth (which, in my opinion, happens far too fast).

EXAMINATION

As the end of the year approaches, our Intersen Phase learners will soon be writing their final examinations. It's essential that they remain focused on academic activities during their weekends and afternoons. I have full faith in their abilities to excel, as they have consistently demonstrated in the past. Please refer to the recent communication distributed this week for more information on the examination schedule.

SWIMMING

Our Grade R students have taken their first splash in the "Water Safety" program, and I'm bursting with pride! Making sure our little ones stay safe around water is a top priority, and I know our parent community shares the same excitement as I do about this terrific initiative. Keep your eyes peeled for more exciting updates on this newest addition to our ECD program in "The Buzz"!

FITNESS FANTASY

It's uplifting to witness the progress in our children's fitness levels as a result of our more intense Physical Education classes and extracurricular activities. As the saying goes, champions are made well before they reach the starting line. Let's continue putting in the hard work so that we can excel in every discipline come the 2024 season.

DIWALI

Sending a sparkling Diwali greeting to all our Hindu community, and a wish for abundance and happiness in the coming year!
